

Why take the risk?

- ♦ **Pillowcases are not leak proof, a potential for artifacts if not clean and can be a source for the spread of infection.**
- ♦ **Trash bags are not designed to properly fit receptors nor do they have a secure closure.**

Protect Your Investment!

Prevent cross-contamination and the spread of germs by using disposable covers that are designed for Radiology Imaging Receptors. These 2 mil polyethylene bags are transparent to x-ray, heavy duty and leak-proof. They are non-sterile and slip over your receptor in just seconds. They are available in a host of sizes to meet your needs and are perfect for ER's, OR's, Surgery Rooms, Mobile Imaging, or anywhere there is a risk for transmitting infection or there's a need to keep your receptor clean!
